

AI-Free Friday Night Waltz

One thing that AI will never replace is human physical contact, especially in the embrace of a waltz.

If you ever find yourself doubting what is real and what is AI-generated in this world, know that FNW's policy is to always be 100% human-created, including all of the dance music.

We don't need to take a stance on the AI debate. We're just letting you know that if you ever want to spend a wonderful night interacting with real people who are physically and emotionally interacting with you, Friday Night Waltz is your destination!
